

Fundamentals

- **Sorting** is the process of arranging data in a specific order.
- The most common sorting algorithms are as follows:
 - **Bubble Sort** – Every pair of adjacent items is compared and items are swapped until they are in order.

1	2	3	4	→	1	2	3	4
31	12	25	8	→	12	31	25	8
12	31	25	8	→	12	25	31	8
12	25	31	8	→	12	25	8	31
12	25	8	31	→	12	25	8	31
12	25	8	31	→	12	8	25	31
12	8	25	31	→	12	8	25	31
12	8	25	31	→	8	12	25	31

- | | | | | | | | | | | | | |
|----|----|----|----|----|----|---|---|----|----|----|----|----|
| 31 | 12 | 25 | 8 | 33 | 17 | → | 8 | 12 | 25 | 31 | 33 | 17 |
| 8 | 12 | 25 | 31 | 33 | 17 | → | 8 | 12 | 25 | 31 | 33 | 17 |
| 8 | 12 | 25 | 31 | 33 | 17 | → | 8 | 12 | 17 | 31 | 33 | 25 |
| 8 | 12 | 17 | 31 | 33 | 25 | → | 8 | 12 | 17 | 25 | 33 | 31 |
| 8 | 12 | 17 | 25 | 33 | 31 | → | 8 | 12 | 17 | 25 | 31 | 33 |

- | | | | | |
|----|----|----|---|----|
| 31 | 12 | 25 | 8 | 17 |
| 12 | 31 | 25 | 8 | 17 |
| 12 | 25 | 31 | 8 | 17 |

8	12	25	31	17
---	----	----	----	----

12	31	25	8	17
12	25	31	8	17
12	25	8	31	17
12	25	8	31	17
12	8	25	31	17
8	12	25	31	17
8	12	25	17	31
8	12	25	17	31
8	12	17	25	31

- **Shell Sort** – Items at a specific interval are sorted. The interval between the items is gradually decreasing based on a sequence. The most common sequence is the original sequence by Donald Shell, the inventor of this algorithm, which is $N/2, N/4, \dots, 1$, where N is the number of items. Insertion sort is applied when the interval reaches 1.

Intervals: $N/2 = 6/2 = 3$
 $N/4 = 6/4 = 1$

31	12	25	8	33	17	→	8			31		
31			8				8				33	
	12			33				12			33	
		25			17				17			25
8	12	17	31	33	25		8	12	17	31	33	25
8	12	17	31	33	25	→	8	12	17	31	33	25
8	12	17	31	33	25	→	8	12	17	31	33	25
8	12	17	31	33	25	→	8	12	17	31	33	25
8	12	17	31	33	25	→	8	12	17	31	33	25
8	12	17	31	33	25	→	8	12	17	31	25	33
							8	12	17	31	25	33
							8	12	17	25	31	33

-
- combined into a single sorted list.
- ```

graph TD
 A["31 | 12 | 25 | 8"] --> B["31 | 12 | 25 | 8"]
 A --> C["33 | 17 | 40 | 42"]
 B --> D["31 | 12"]
 B --> E["25 | 8"]
 C --> F["33 | 17"]
 C --> G["40 | 42"]
 D --> H["12 | 31"]
 E --> I["8 | 25"]
 F --> J["17 | 33"]
 G --> K["40 | 42"]
 H --> L["8 | 12 | 25 | 31"]
 I --> L
 J --> M["17 | 33 | 40 | 42"]
 K --> M
 L --> N["8 | 12 | 17 | 25 | 31 | 33 | 40 | 42"]
 M --> N

```

- ```
Java: ArrayList values = new ArrayList();
      Collections.addAll(values, 1, 3, 2);
      Collections.sort(values);
Python: values = [1, 3, 2]
        values.sort()
```
